

CITY OF SPRINGFIELD  
INTER-OFFICE MEMORANDUM

ATTENTION OF David Snider

DATE June 20, 1979

DEPARTMENT \_\_\_\_\_

On June 20, 1979, J.D. Slaughter and myself repounded to a complaint referred to us by Bob Wilson of the Health Dept. Our inspection revealed that the problem involved a sump pump discharge from a loading dock at the rear of the store on Dysart Avenue. A violation of Section 30-8 of the Springfield City Code was found to exist due to the fact that "Squeezings" from a trash compactor enter a trench drain in the loading dock and are pumped to a ditch on the west side of Dysart. This problem is apparently created by the fact that waste produce (vegetables, etc.) is disposed of in the compactor and "Squeezings" are ultimately discharged to the ditch; causing a pint source of pollutants and possible health hazards.

We suggested to the store manager that only dry solid waste be disposed of in the compactor and produce waste be disposed of in water tight trash containers. The store manager agreed to this but indicated a health problem exists anyway due to poor drainage in the ditch. He also indicated that truck traffic through the ditch contributes to the drainage problem. We agreed to contact you or Jim Barber informing you of the drainage problem and indicated someone would contact him in the regard. We will continue to watch their operation and see if the aforementioned measures will control the pollution problem

J. Randall Lyman  
Water Pollution Control Inspector III  
Surveillance & Enforcement

cc: Harry Criswell, Associate Sanitary Engineer  
Bob Wilson, Health Department  
John Nixon, Missouri Department of Natural Resources  
Jim Barber, Supt. of Streets  
Randy Freeman, Grocery Manager
